

THIN-LAYER BUBBLER BLOWER

ABSTRACT OF THE DISCLOSURE

A thin-layer bubble blower includes a thin-layer container of
5 thickness within 2~6mm, the thin-layer container defining a flat
liquid chamber for holding a bubble solution and an opening in
communication with the flat liquid chamber, and a bubble-blowing
bar for blowing said bubble solution into bubbles, the bubble-blowing
bar having a rubber stopper, which seals the opening of the thin-layer
10 container after insertion of the bubble-blowing bar into the flat liquid
chamber.
